

Creative Art Project B

Photomontages x 3

Total Points: 30 maximum

Due Friday, October 20th

Design each of the different types of photomontages below:

- 1 - **Emphasis with Scale and/or Proportion** photomontage with hidden object(s).
- 2 - **Implied Space through various Perspectives** photomontage.
- 3 - **Gestalt (unity & variety)** photomontage with lettering.

Photomontage A montage is a collection of objects that form a unified whole. A photomontage is a collage using photographs or photographic imagery that are put together to form the illusion of a single image. A photomontage can look normal or surreal.

When making your photomontage, have an open mind. Whenever you use collage, you have to work with what you find. It is usually a good idea to let the pictures suggest the composition rather than looking for pictures that satisfy a preconceived image.

For more information on making these photomontages,

view the instructions for each type of photomontage on my website - visualartnotes.com.

Written portion

You'll also need to complete one written portion for your photomontages, which should include the following:

- a. How you went about your process from beginning to end.
- b. Describe other strong visual elements and/or principles of design, beyond its original intent, which you incorporated into each photomontage. What makes your compositions effective?
- c. How would you assess your technical skills and what would you have done differently?
- d. Were your photomontages successful? Why or why not?

Your paper should be 2-3 pages. Typed, double-spaced. Font size should be not larger than Times New Roman 12, if you are using a different font style. Margins are standard - 1" top, bottom & sides.

Grading criteria:

- Selecting interesting imagery for each type of photomontage. (2 pts each = 6 pts total)
- Creating effective compositions which reach its given parameters. (4 pts each = 12 pts total)
- Choosing effective values and colors which work well together. (1 pt each = 3pts total)
- Assessing your technical skills and craftsmanship. (3pts)
- Quality and thoroughness of your written analysis. (3pts)
- Following directions. (3pts)
